Over 25 Years of Advocacy

Founded in 1984 to serve the unique needs of aviation maintenance industry, and now including design and production interests, ARSA has a distinguished 25-plus year history of representing certificated entities with a single voice. The association promotes laws and regulations that establish reasonable aviation safety standards written in a clear and concise manner and applied consistently and uniformly while advocating for the industry's interests in the press.

To fulfill its mission, ARSA:

- Raises the profile of the aviation maintenance industry, by representing members before the Federal Aviation Administration (FAA), other regulatory agencies, legislative bodies and media outlets around the world;
- Provides policy guidance to lawmakers and regulators;
- Educates the industry, legislators, media and the general public through publications, training programs and the Annual Repair Symposium;
- Provides training programs, advisory materials and news services; and
- Offers technical and regulatory expertise to analyze and respond to government actions and press inquiries.

Essential to Business

The association's work isn't sexy, it is essential! Ensuring good government and fair oversight is hard work—differentiating between government functions and industry responsibilities; reviewing and commenting on proposed rulemaking and guidance documents; ensuring uniform enforcement, and delivering essential news through training and publications. ARSA does the spadework that provides the aviation industry with the essential knowledge and practical advice needed to ensure business survival.

Member Services

The association's monthly newsletter is the leading publication on regulations impacting civil aviation. **The hotline** reports on the latest FAA rules and guidance material, legislation and international aviation developments. It also features regular columns on key issues like employment and export compliance laws. We keep our members abreast of the latest news by providing a weekly bulletin with information on just-released rulemakings, legislation, regulatory guidance and other key developments.

ARSA members take advantage of substantially reduced rates for our Annual Repair Symposium and for training programs. The association aims its products and services at executives and regulatory compliance specialists with members receiving significant discounts on these valuable offerings.

Membership also entitles your repair station to participate in, the Aviation Alliance Insurance Risk Retention Group, a new insurance option for the aviation maintenance industry that is exclusively available to ARSA members (more information is available at www.aairrg.com).

Legislative Information

ARSA's Legislative program protects industry interests and improves markets for your business. Our Action Center (<http://www.arsa.org/LegislativeActionCenter>) provides easy to use steps that allow companies to become more engaged in the legislative process. It also includes information on ARSA's efforts on Capitol Hill, such as protecting the use of foreign repair stations and preventing the passage of laws detrimental to your business.

The Legislative Action Center also provides access to legislative information for ARSA members through our grassroots action site (<http://www.ARSAAction.org>). Getting members to communicate with Capitol Hill increases the industry's visibility and impact.

Media Advocacy

ARSA promotes and defends the safety record and value of aviation maintenance in trade, local and national press outlets. The association monitors and responds to maintenance stories; prepares and distributes press releases and editorials; and researches the economic footprint of repair stations. As recognized experts, ARSA's leadership has commented on stories in local and national media outlets such as *MSNBC*, *the Washington Post* and PBS' *Frontline*.

Join ARSA and Make a Difference!

Fill out the membership application on the back of this form and mail it to us at the address above, or join online at <http://www.arsa.org/MembershipAppARSA> and make a difference in your industry!
